Engineering Capability

Rapallo has a track record of excellence in all engineering disciplines.

“For a company of our size, we punch well above our weight when it comes to the depth of our skills and talent,” says MD Peter George.

This enables the engineering division to guide a project through its entire life cycle, from feasibility studies and design engineering through to developing concepts and completion. A key feature of this team’s service is a flexible approach that allows custom-made solutions to challenges as they arise. When necessary, staff work closely with Rapallo’s other divisions to ensure projects are completed with the best possible outcomes.

“We encourage a culture of collaboration,” Mr George says.

Mechanical Engineering

Our team has considerable expertise in the mining and mineral processing industry. Services include feasibility and scoping studies, detailed design, project management, construction and trouble shooting.

Civil/Structural Engineering

We strive to provide practical and commercially sound design solutions that meet Australian standards as well as other relevant design and safety requirements.

Electrical and Instrumentation Engineering

We have considerable design, auditing, management and trouble shooting experience in HV and LV.

Mining Engineering

With local and international experience, our team can assist with conceptual scoping, feasibility studies, due diligence investigations, trouble shooting, mine management/engineering secondments, mine design and financial modelling.

Engineering Drafting

Our drafting teams in Perth and Kalgoorlie are experienced in mechanical, civil, structural and electrical drafting. Services range from simple sketches to full 3D design drawings for contractual construction projects. We specialise in the latest versions of the following packages:

- Solid Works
- Microstran V8
- Auto CAD
- Microstation
- Limcon
