

ASSET MANAGEMENT INSPECTION SERVICES

Capability Statement

Rapallo is a leading Western Australian engineering company with a strong reputation for technical excellence, client-focus and innovation. We build long-term alliances through outstanding delivery on a range of services to the resources sector, government and associated industries.

Asset Management Inspection Services Capability

A reliable and experienced asset management team is vital to the smooth and efficient running of plant and installations. Our clients have the option of outsourcing their asset management and benefiting from our division's vast depth of skills: engineers, inspectors, NDT technicians, construction supervisors, estimators, maintenance consultants and planners. This team, with its experience of working in diverse locations, can ensure assets are maintained in the safest, most cost-effective way and at optimum production levels. In addition, our ability to verify design, fabrication, installation and operation safeguards clients against default and non-compliance with codes, standards, warranties, regulations and obligations.
