

## PROJECTS

### Capability Statement

Rapallo is a leading Western Australian engineering company with a strong reputation for technical excellence, client-focus and innovation. We build long-term alliances through outstanding delivery on a range of services to the resources sector, government and associated industries.

## Projects Capability

Rapallo has a long-standing record of exceptional project management. From inception to completion, we deliver the highest standards of quality and safety on a variety of commercial and mine site installations.

“Each and every project is treated with the highest level of importance,” says Rapallo’s MD Peter George.

Clients have the benefit of this division’s solid relationships with local authorities, contractors and suppliers as well as our familiarity with contractors’ capabilities and cost-effectiveness.

Depending upon the project and our clients requirements, we can undertake these projects as client representatives, managers, sole contractors all as an integral part of the project team.

### Conceptual Design

We guide clients to informed decisions using extensive knowledge of requirements and constraints.

### Feasibility Studies

Our knowledge of prices, sub-contractors, environmental conditions and local authority requirements provides clients with a clear picture of costs and logistical challenges.

### Design Engineering

Our engineers strive for practical and cost-effective design solutions.

### Documentation, Tendering & Tender Review

Our team is committed to ensuring that clients can make informed decisions on the best possible contractor for their project.

### Contract Management

Our team long ago made the leap from old-economy ERP planning to efficient, dynamic business processing. This ensures a contract is streamlined through planning, negotiation, storage, maintenance and analysis. High competence in vital areas, including contract law, administration, accounting, management and planning, gives our clients the best possible service.

### Construction Supervision and Procurement

Liaison with suppliers, contractors, site visits, tests and inspections ensure that projects are constructed in accordance with specifications and to best practice standards.

Communication with the client is paramount throughout all stages of the build.
