

## ASSET MANAGEMENT TROJAN CLASSIFIED PLANT REPORTING SYSTEM Capability Statement

Rapallo is a leading Western Australian engineering company with a strong reputation for technical excellence, client-focus and innovation. We build long-term alliances through outstanding delivery on a range of services to the resources sector, government and associated industries.

# Asset Management Trojan Classified Plant Reporting System Capability

A reliable and experienced asset management team is vital to the smooth and efficient running of plant and installations. Our clients have the option of outsourcing their asset management and benefiting from our division's vast depth of skills: engineers, inspectors, NDT technicians, construction supervisors, estimators, maintenance consultants and planners. This team, with its experience of working in diverse locations, can ensure assets are maintained in the safest, most cost-effective way to ensure optimum production levels. In addition, our ability to verify design, fabrication, installation and operation safeguards clients against default and non-compliance with codes, standards, warranties, regulations and obligations.

Compliance of classified fixed and mobile plant to legislative requirements calls for timely and comprehensive inspections and documentation by qualified and competent Inspectors. Rapallo can provide these people and services from our Asset Management Division, however what sets Rapallo services apart from others is the reporting and documentation systems we have in place to allow fast report availability, storage and retention of historical reports and supporting documentation.

Rapallo has the expertise to assist and guide clients through the Classified Plant Compliance Lifecycle. From Concept to Redundancy Classified Plant requires competent 3rd party Review/assessment reporting and collation of associated documentation to meet legislative compliance. Rapallo can support clients through this process and provide a web-based reporting system that consolidates compliance report history and supporting documents - Rapallo Trojan™. This system allows Site Managers access to a comprehensive data base documenting the real-time compliance status of all fixed and mobile Classified Plant.

Rapallo Trojan™. has been designed and built in-house under the direction of experienced Plant Inspectors.

## Structure customisation to suit client business model.
